UNION PACIFIC IN WASHINGTON

Union Pacific serves many of the 75 ports across the state of Washington, notably Seattle, Tacoma and Kalama, helping strengthen development and the economy in communities throughout the state. Union Pacific is a proud partner and supporter of the Northwest Seaport Alliance, whose cargo and container operations are a hub for regional and global trade.

Union Pacific's Freight Mobility Strategic Investment Board (FMSIB) partnership furthers our efforts to enhance Washington's transportation infrastructure and better serve our Washington customers. Grade separations, crossing safety and other transportation topics critical to residents of Union Pacific's Washington communities are a major focus of FMSIB's Union Pacific collaboration.

Union Pacific's community focus is embedded in the company culture. In Washington, this means fostering critical relationships with the Puyallup Native American Tribe, as well as in the cities and towns where Union Pacific trains operate.

UNION PACIFIC IN WASHINGTON

Union Pacific operates two north-south main lines in Washington, with a connection to the Canadian rail system. From 2018-2022, Union Pacific invested more than \$95 million strengthening Washington's transportation infrastructure.

Union Pacific proudly supports Washington nonprofit organizations through its Community Ties Giving Program. In 2022, the company provided more than \$161,000 to local groups, including the Boys & Girls Clubs of South Puget Sound, Columbia Basin College Foundation and Providence Health Care Foundation of Eastern Washington. Grants are awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; and creating vibrant community spaces.

DRIVING INNOVATION AND SUSTAINABILITY

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety tool kit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is researching autonomous drone infrastructure inspection technology, enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

Union Pacific also is using technology to drive fuel efficiency. One train can take several hundred trucks off Washington's already congested highways. A Union Pacific train can move one ton of freight 463 miles on a single gallon of diesel, generating a carbon footprint that is 75% less than trucks.

AMERICA'S PREMIER RAILROAD

Union Pacific Railroad is the principal operating company of Union Pacific Corporation (NYSE: UNP). One of America's most recognized companies, Union Pacific Railroad connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2013-2022, Union Pacific invested approximately \$34 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its roughly 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
