SUPPORTING WISCONSIN'S ECONOMY

Union Pacific crosses “America’s Dairyland” from the Twin Cities through Eau Claire and into Milwaukee, as well as south along Lake Michigan into Chicago.

Milwaukee is best known for baseball and beer, and Union Pacific supports the latter, carrying malt house supplies. The company also supports local flour mills. Other commodities transported include coal, frac sand, finished vehicles, auto parts and potash, used in fertilizers.

The company proudly supports Wisconsin organizations through its Community Ties Giving Program. In 2022, Union Pacific provided more than \$121,000 to local groups, such as the Boys and Girls Club of Greater Milwaukee Inc., Somers Fire Department and Discovery World. Grants are awarded to programs meeting one of Union Pacific’s philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; and creating vibrant community spaces.

UNION PACIFIC IN WISCONSIN

INVESTING IN SAFETY

The safety of Union Pacific's employees, customers and the communities it operates in is the company's No. 1 priority. From 2018-2022, Union Pacific invested more than \$117 million strengthening its Wisconsin infrastructure. Annual projects include new ties and rail, as well as bridge maintenance.

Union Pacific special agents work in tandem with local law enforcement officers to enhance rail safety. The goal is decreasing crossing accidents and, ultimately, eliminating them.

DRIVING INNOVATION AND SUSTAINABILITY

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety tool kit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is researching autonomous drone infrastructure inspection technology, enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

Union Pacific is also using technology to drive fuel efficiency. One train can take several hundred trucks off Wisconsin's already congested highways. Union Pacific trains can move a ton of freight 463 miles on a single gallon of diesel fuel, generating a carbon footprint that is 75% less than trucks.

AMERICA'S PREMIER RAILROAD

One of America's most recognized companies, Union Pacific Railroad (NYSE: UNP) connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2013-2022, Union Pacific invested approximately \$34 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its roughly 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
